

Compact wet&dry vacuum cleaner with filter cleaning and ergonomic design

Being compact, light-weight and robust, the AERO wet and dry vacuum cleaner can easily be transported to any location. After finishing your job, the container can easily be emptied - either by disposing of the standard fleece filter bag or tipping the container by the lifting handle. The Push&Clean filter cleaning system prevents loss of performance as the filter can be cleaned whilst the machine is in use. An innovative accessory storage solution makes it easy to place suction hose, nozzles and power cord in several positions with built-in 2-points tube parking, so the machine can quickly be put to use. The AERO 26 is compact and easy to use and is equipped with a power take off socket for use with power tools. This makes the machine the ideal choice for smaller cleaning jobs both in workshops or at customer sites. It is a light-weight and robust for workers within industry, automotive and building & construction featuring ergonomic design, semi-automatic filter cleaning, auto on off with power tools and convenient storage.

- Washable PET fleece filter with minimum 99,9% filtration efficiency
- MultiFit accessory system for ultimate flexibility
- Convenient accessory/cable storage and tool deposit
- Exhaust air blow function
- Flexible rubber strap for hose storage

Picture shown may not represent model quoted

The AERO 26 is the feature model of the AERO 21/26 series with high focus on application and end-user needs. Push&Clean filter cleaning system and exhaust air blow function is found on all models together with flexible and convenient accessory storage. The 25 litre machine has efficient suction performance which can be maintained during use using the Push&Clean system to clean the filter. A Power socket with AutoOnOff activates the machine when the power tool, plugged into the socket, operates thus providing efficient dust extraction from the power tool.
